## Back-to-Back Services Bench with Height Adjustable Microscope Table

### Description

- The FLX Back-to-Back Services bench revolutionizes lab furniture with its **component-welded steel frame and knock-down design** (flat-packed for simplified shipping). Assembly is a breeze, requiring only 6 bolts.
- This innovative bench addresses common lab challenges head-on. The back-to-back service bench has an option with adjustable shelves. **Integrated wire management** troughs conceal electrical cords and services, maintaining a clean aesthetic. FLX seamlessly integrates with overhead service panels and allows for flexible service line routing, both above and below the bench.
- **Universal single-configuration parts** ensure ease of use and installation, while back-to-back configurations require just a work surface and a support frame with legs. This modular approach minimizes freight and installation costs while maximizing space utilization and lab efficiency. FLX empowers labs to repurpose and reconfigure their layout quickly and effortlessly, adapting to evolving needs.
- **Maximize Configurability:** FLX offers unmatched adaptability. Single-sided units can be easily converted to double-sided configurations with the purchase of a convenient add-on kit, providing even more flexibility for your lab's layout.
- **Seamless Microscope Integration:** Connecting two FLX units is a specially designed, height-adjustable table that functions flawlessly as a microscope table. The ergonomic curved form allows for comfortable use of the microscope in both seated and standing positions.

## Unique Design Elements

- 84H shared spine, used to route power/data/services above or below the workspace
- Worksurfaces on double-sided units are independently adjustable at 30", 36", and 42" AFF

## Specifications as Seen at Neocon

- 0.75" Black Phenolic (Worksurface)
- Black Texture Steel, BK59 (Frame)

## Surface Options
