

FOR IMMEDIATE RELEASE

Col-Lab Table

Austin, TX – June 2024 – Col-Lab Table has been specifically designed for off-carpet environments. This pivotal element in the future of lab design fosters the creation of "collision zones" – strategically placed areas within the lab where research and collaboration can thrive.

The Col-Lab Table promotes close-proximity interaction, creating collision zones that minimize distances and streamline the research workflow. By bringing researchers together, these zones significantly enhance efficiency and foster a more human-centric approach to lab work environments.

Paired with a monitor, Col-Lab serves as a central hub for information sharing. Additionally, dry-erase glass partitions encourage brainstorming and real-time communication, ensuring that ideas can be captured and shared effortlessly. This integration of collaborative tools ensures that labs are equipped to meet today's standards and are future-proofed for evolving needs.

The Col-Lab Table embodies the latest in collaborative standards, offering a seamless blend of technology and functionality. Its design not only supports current research methodologies but also anticipates the future needs of innovative lab environments.

The Col-Lab Table is a game-changer for off-carpet lab environments, enhancing workflow efficiency and fostering a collaborative spirit that is essential for groundbreaking research.
